Profile

4th-year Computer Science Engineering student at ESPRIT with expertise in AI/ML, full-stack development, and data science. Demonstrated leadership through award-winning projects and impactful internships. Passionate about creating innovative solutions that drive social impact and technological advancement.

Education

2022 - Current

National Diploma in Computer Science Engineering (equiv. MSc), ESPRIT – Tunis, Tunisia

- Specializing in Artificial Intelligence

2018 - 2022

High School Diploma with Honors in Mathematics (Mention Bien), Tahar Sfar High School – Mahdia, Tunisia

Experience

Oct 2025 – Current

Applied AI Engineer Intern, Phundit – Ghana (Remote)

- Developing AI-powered fintech solutions using graph databases and machine learning technologies
- Building behavioral pattern recognition systems and personalization engines for financial applications
- Implementing graph-based algorithms and real-time data processing systems using Python and FastAPI

July 2024 – Aug 2024

AI Software Developer Intern, RFC – Tunis, Tunisia

- Developed Django REST backend and React TypeScript frontend for enterprise RAG platform
- Integrated authentication systems with role-based access control and multi-model LLM support
- Built document processing pipelines with vector search and admin dashboards for system monitoring

July 2023 – Aug 2023

IT Infrastructure & Systems Administration Intern, General Electric Digital – Ben Arous, Tunisia

- Managed VMware infrastructure, DNS configuration, and FortiGate firewall rules
- Administered Windows Group Policies and remote systems via PowerShell
- Applied APM/OPM for turbine performance monitoring systems

Projects

Jan 2026

SavyOR - AI-Powered Life Crisis Response System

- Developed emergency response system with 6 AI modules for cardiovascular and pulmonary emergencies
- Built multimodal first aid assistant with RAG, voice interaction, and vision analysis
- Trained ST-GNN for incident hotspot prediction (RMSE: 0.0931) and PPO agent for ambulance dispatch
- Created full-stack application with Django backend and React/TypeScript frontend

2025

AIGIS - AI-Powered Browser Extension (1st Place - Bal de Projets)

- Built browser extension detecting grooming, fake profiles, violence, and deepfakes using multimodal AI
- Developed caring chatbot with RAG and explainable AI, plus parental dashboard with real-time alerts
- Used Django (DRF), PostgreSQL, and custom models (ResNet, LSTM, XceptionNet)

2024

Dishboard - Django Web App

- Built Django app with Spoonacular API generating personalized recipes from pantry ingredients
- Integrated OpenCV for automatic ingredient detection and real-time pantry tracking
- Designed research hub with nutrition articles and summarizer tool for research papers

Skills

Programming Languages: Python, Java, C/C++ , JavaScript, PHP, SQL

Web Technologies: React, Django, Node.js, Express.js, HTML5, CSS3, Bootstrap

AI/ML & Data Science: TensorFlow, PyTorch, Scikit-learn, OpenCV, NLP, Computer Vision

Databases & Cloud: MySQL, PostgreSQL, MongoDB, Azure, Docker, Git

Soft Skills: Leadership, Team Collaboration, Problem-Solving, Communication, Project Management

Certifications

365 Data Science: Data Cleaning with pandas, Mathematics

NVIDIA: Fundamentals of Deep Learning, Transformer-Based NLP, Generative AI with Diffusion Models, Adding New Knowledge to LLMs, Applications of AI for Anomaly Detection, Applications of AI for Predictive Maintenance, Building AI Agents with Multimodal Models

ETS: TOEFL iBT – Score: 96/120 (C1 Level)
